## **DETAILED ACTION**

### ***Drawings***

The drawings were received on 7/17/06. These drawings are accepted.

### ***Response to Arguments***

Applicant's arguments that the amended claims are allowable due to the amendments have been fully considered and are persuasive. The rejections of claims 1-3, 7-11 and 15-19 have been withdrawn.

### ***Allowable Subject Matter***

Claim 1-20 allowed.

With respect to Claims 1 and 17, the following is an examiner's statement of reasons for allowance: The prior art does not disclose or suggest, in combination with the limitations of the base claim and any intervening claims, primarily for switching the minimum operating voltage from the second non-zero voltage value to the first non-zero voltage value if the load of the switching power supply is greater than a determined load and the supply voltage is greater than the first non-zero voltage value.

With respect to Claim 9, the following is an examiner's statement of reasons for allowance: The prior art does not disclose or suggest, in combination with the limitations of the base claim and any intervening claims, primarily switching the minimum operating voltage from the second non-zero voltage value to the first non-zero voltage value when the first comparator indicates that the control voltage is greater than the first reference voltage and the second comparator indicates that the supply voltage is greater than the first non-zero voltage value.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
